

Sarthak Kumbhar

Software Engineer Level 1

sarthakkumbhar26@gmail.com [Navi Mumbai, Maharashtra](#) [9359897784](#) github.com/Sarthaksk26

Frontend Developer with over 1.5 years of enterprise experience at Hexaware Technologies and a strong technical foundation in the MERN stack. Proven ability to architect high-performance, responsive web applications leveraging React, Tailwind CSS, and state management architectures like Redux Toolkit. Brings a unique, quality-first approach to development by applying rigorous enterprise software standards to ensure pixel-perfect, zero-defect UI/UX implementations. Passionate about writing clean, scalable code and solving complex business logic, from seamless payment integrations to dynamic user platforms.

Experience

Hexaware Technologies Limited	08/2024 – Present Navi Mumbai
Software Engineer Level 1	
Frontend Quality & UI/UX Validation: Collaborated directly with cross-functional frontend engineering teams in an Agile environment to ensure flawless UI/UX execution for a globally scaled, high-traffic application. Debugging & State Analysis: Analyzed application state, DOM behavior, and network payloads to isolate, debug, and document complex frontend defects, accelerating the bug-fix turnaround time. Cross-Browser & Responsive Architecture: Validated responsive web designs, cross-browser compatibility, and accessibility standards across multiple viewports and edge cases prior to production deployment. Agile SDLC Integration: Participated actively in Sprint Planning and Retrospectives, aligning on frontend architecture requirements, user workflows, and technical constraints early in the development lifecycle.	

Projects

EESA Committee Web Platform	Present
Lead Frontend Developer Developed for Government College of Engineering, Karad (GCEK)	
Developed a high-performance SPA using React 18 and Vite, implementing route-level code splitting and lazy loading to achieve a 95+ Lighthouse performance score. Designed a modern, "electrical-themed" UI with Tailwind CSS v4 and Intersection Observer, featuring a custom Masonry gallery, dynamic events timeline, and glassmorphism effects. Optimized for SEO and Accessibility using JSON-LD structured data, semantic HTML, and ARIA roles, ensuring high search visibility and WCAG compliance.	
Smart Media Search	Present
A high-performance discovery platform powered by Gemini Flash AI and Redux Toolkit.	
AI-Enhanced Discovery: Built a "Smart Search" engine using Gemini 3 Flash that semantically expands user queries and generates automated visual captions/metadata for image assets. High-Performance State: Leveraged RTK Query and TypeScript DTOs to aggregate and synchronize real-time media from Unsplash, Pexels, and Tenor with zero-error type safety. Scalable Architecture: Optimized application performance via Code Splitting (React.lazy) and Suspense, maintaining a seamless 60fps UI experience across 10,000+ searchable items. - React, TypeScript, Redux Toolkit, Gemini AI, Tailwind CSS, Framer Motion.	

Education

B. Tech. in Electrical Engineering (7.94 CGPA)	2021 – 2024
Government College of Engineering, Karad	
HSC (77.54%)	2020
Sadhana Jr. College of Science, Gadhinglaj	
SSC(90.80%)	2018
Sou. V. D. Shinde Highschool, Gadhinglaj	

Skills

Web Development — Typescript, Javascript, Node.js, Express.js, MongoDB, HTML5, CSS3, Tailwind CSS, React.js,
Tools & Platforms — Jira, Git, GitHub, Postman Testing & QA — Manual Testing, Test Case Design, Defect Tracking, SDLC, STLC, UAT

Languages

English | Hindi | Marathi
