SUMMARY

Frontend Developer in the making, with 1.5 years of enterprise experience at Hexaware Technologies working closely with production React engineering teams on a globally scaled application. That proximity to real-world frontend systems — debugging component state, validating responsive architectures, and living inside Agile sprints — shaped how I think about building UI. Outside of work, I’ve channelled that into independent projects: a React 18 SPA hitting a 95+ Lighthouse score, an AI-powered media platform built with TypeScript, Redux Toolkit, and Gemini 2.0 Flash, and a client-facing portfolio website delivered as a freelance work. I write clean, performance-first code and I’m looking to bring that quality-driven mindset into a full-time frontend engineering role.

EXPERIENCE

Software Engineer L1 — Frontend QA & UI Validation,

08/2024 – Present

Hexaware Technologies Limited

Navi Mumbai

- **UI/UX Validation:** Embedded within cross-functional React engineering squads in an Agile environment to validate UI/UX execution for a globally scaled, high-traffic web application.
- **Debugging & State Analysis:** Analysed React component state, DOM behaviour, and network payloads to isolate and document complex frontend defects — accelerating bug-fix turnaround across sprint cycles.
- **Cross-Browser & Responsive Testing:** Ensured responsive design correctness, cross-browser compatibility, and WCAG accessibility standards across multiple viewports before each production release.
- **Agile Collaboration:** Participated in Sprint Planning and Retrospectives, gaining direct visibility into enterprise-grade frontend architecture decisions and user workflow design.

PROJECTS

EESA Committee Web Platform, *Lead Website Developer*

12/2024 – Present

Live [🔗](#) and Github [🔗](#)

- **Stack:** React 18, Vite, Tailwind CSS v4, Intersection Observer, JSON-LD, ARIA, Vercel
- **Performance:** Built a high-performance SPA using React 18 and Vite with route-level code splitting and lazy loading — achieving a 95+ Lighthouse performance score.
- **UI Design:** Designed an electrical-themed interface with Tailwind CSS v4 featuring a custom Masonry gallery, dynamic events timeline, and glassmorphism visual effects.
- **SEO & Accessibility:** Implemented JSON-LD structured data, semantic HTML5, and ARIA roles ensuring full WCAG compliance and strong search engine visibility.

Smart Media Search, AI-Powered Media Discovery Platform

01/2026 – Present

Live [↗](#) and Github [↗](#)

- Stack: React, TypeScript, Redux Toolkit, RTK Query, Gemini 2.0 Flash, Tailwind CSS, Framer Motion
- AI Integration: Built a Smart Search engine using Gemini 2.0 Flash that semantically expands user queries and auto-generates visual captions and metadata for image assets.
- State Management: Leveraged RTK Query and TypeScript DTOs to aggregate and sync real-time media from Unsplash, Pexels, and Tenor APIs with zero-error type safety.
- Scalable Architecture: Optimised performance via React.lazy and Suspense code splitting, maintaining a seamless 60fps experience across 10,000+ searchable media items.

Client Portfolio Website, Freelance Project

03/2026 – 03/2026

Live [↗](#) and Github : Private (Request by client)

- Stack: React, Tailwind CSS, Vite, Vercel
- Client Delivery: Designed and developed a fully responsive personal portfolio for an external client — handling requirement gathering, UI decisions, and end-to-end deployment independently.
- Design & UX: Built a clean, modern interface with smooth animations, mobile-first layout, and optimised load performance tailored to the client’s personal brand.
- Freelance Ownership: Managed the complete project lifecycle solo — from initial brief to final handoff — demonstrating ability to deliver production-ready frontend work on deadline.

EDUCATION

B.Tech – Electrical Engineering (CGPA: 7.94), Government College of Engineering, Karad	2021 – 2024
HSC (77.54%), Sadhana Jr. College of Science, Gadhinglaj	2020
SSC (90.80%), Sou. V. D. Shinde Highschool, Gadhinglaj	2018

TECHNICAL SKILLS

Languages JavaScript (ES2023), TypeScript, HTML5, CSS3	Frameworks & Libraries React 18, Redux Toolkit, RTK Query, Tailwind CSS v4, Framer Motion, React Router
AI & APIs Gemini 2.0 Flash API, Unsplash API, Pexels API, Tenor API	Performance & Standards Web Vitals (LCP, FID, CLS), WCAG Accessibility, SEO, Responsive Design
Testing & QA Manual Testing, Test Case Design, Defect Tracking, SDLC, STLC, UAT	Tools & Platforms Git, GitHub, Vite, Postman, Jira, Vercel, Figma (reading designs)

LANGUAGES

English Professional	Hindi Native	Marathi Native
